PROFESSIONAL SUMMARY

Full-Stack AI Engineer and SaaS Architect with expertise in building high-performance, modular ecosystems using Next.js, FastAPI, and TypeScript. Specialist in developing forensic-level AI solutions, including content integrity engines, automated humanization pipelines, and LLM-powered academic scaffolding. Proficient in architecting secure, scalable infrastructures with Supabase, Stripe, and multi-model AI orchestration (Groq, Gemini). Passionate about building ethical, human-centric software that restores trust in the era of generative automation.

EDUCATION

NSHM College Of Management and Technology, Durgapur

Masters Of Computer Application

Aug 2023 - Present

Pursuing

NSHM College Of Management and Technology, Durgapur

Aug 2020 - June 2023

Bachelors Of Computer Application

CGPA: 8.01

SGDM College Patna

May 2017 - June 2019

Higher Secondary

Percentage: 62

DAV Public School Cant Road Khagaul, Patna

March 2008 - May 2016

Senior Secondary

CGPA: 6.4

RECENT EXPERIENCE

INFOTRIXS

Nov 2023 - Feb 2024

(Front-End Developer)

Internship

- Collaborated with cross-functional teams to sign front-end requirements.
- Ensuring a consistent user experience across all pages on the website.
- Create and maintain CSS style sheet, establish a clean and maintainable front-end design system, leading to faster development for new features.

RIYO ADVERTISING

August 2025 - Present

(Front-End Developer)

- Worked as a Front-End Developer on multiple client and in-house projects for the company.
- Currently contributing to a core company product, directly impacting business operations.
- Built responsive and user-friendly UI using HTML, CSS, Tailwind CSS and Javascript.
- Improved website performances, UI consistency and usability across devices.
- Collaborate with design back end developers and managers to deliver features on time.
- Maintained and update existing code base without breaking live functionality.
- Clean Code practices and reusable component based structure.
- Reduced page load time by 30

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Database: Supabase (PostgreSQL).

Backend: FastAPI, Rest APIs, JWT Authentication, Asynchronous Programming, Node.js.

Front-end: HTML5, CSS, Tailwind CSS, Next.js 15, React.js, Shadcn UI.

Framework: Bootstrap, WordPress, ReactJS

Tools: VS Code, Git, GitHub, Postman, Vercel, Render.

AI ML: LLM Integration, Prompt Engineering, (Llama-3.3-70b, Gemini, GPT-4o), Content Humanization and Forensic Detection.

Concept: API Design, MVC Architecture, CRUD Operations, Data Validations, Error Handling, Email Automation, Session Management

COLLEGE PROJECTS

Advertisement Management Or User Support Platform

(Riyo Advertising)

- Tech Stacks: HTML5, Tailwind CSS, JS and PHP.
- Design and develop a web-based advertisement support platform to assist users with ad-related services and workflows.
- Built a responsive and modern UI using HTML, Tailwind CSS, ensuring smooth experience across devices.
- Implemented interactive features using JavaScript for better user engagement.
- Develop backend functionality using PHP to handle form submissions, user data, and business logic.
- Worked on this as a live company projects, aligned with real business requirements.

PERSONAL PROJECTS

MindCare – AI-based Mental Health Counseling Platform

- Developed an AI-driven mental health web application using FastAPI and JavaScript to assess employee well-being through a customized DASS-21 questionnaire.
- Integrated a chat-based counselor powered by Groq AI with session tracking and personalized recommendations.
- Designed secure API endpoints, automated email alerts for severe cases, and implemented JSON validation and session history.
- Built with a modular backend, tested with Postman, and structured for future integration of video calls, dashboards, and login systems.

Authentiq AI – The Sovereign Content Integrity Ecosystem (Full-Stack SaaS Platform)

- Tech Stack: Next.js 15 (App Router), FastAPI (Python), TypeScript, Supabase (PostgreSQL), Groq (Llama-3.3-70b), Google Gemini, Tailwind CSS 4.0, Stripe API.
- Modular Architecture: Engineered a high-performance modular system featuring four core domains: Forensic AI Detection, Content Humanizer, Thesis Co-pilot, and an Integrated AI Workspace.
- Forensic Intelligence: Developed a multi-source similarity scanning engine and AI footprint detector capable of bypassing advanced detectors like Originality.ai and ZeroGPT with real-time confidence scoring.
- Scholarly Intelligence (Thesis Co-pilot): Implemented a Socratic Mentorship model that provides academic scaffolding (chapter-wise outlines, research gaps) using Semantic Scholar API integration for PhD-level research guidance.
- Commercial SaaS Layer: Integrated Supabase Auth (Social and Magic Links) and Stripe for tiered subscription management, along with a custom referral system and admin control portal.
- Data Sovereignty: Built a privacy-first writing environment with a "Zero-Training Guarantee," ensuring user data is never used for model training.

Personal Portfolio Website

- Designed and developed a responsive portfolio using HTML, CSS, and JavaScript to showcase projects and skills professionally.
- Integrated a working Contact Us form that sends messages directly via email for client and recruiter interaction.
- Implemented full-page animations, interactive UI effects, and smooth transitions for an engaging user experience.
- Added dark/light mode toggle to enhance accessibility and visual appeal across different user preferences.

COLLEGE PROJECTS

E-Commerce Website

- Worked as part of a team to build a fully functional e-commerce website using HTML, CSS, and JavaScript, delivering a seamless shopping experience.
- Integrated Firebase Authentication to securely handle user sign-ups, logins, and password management, ensuring data security and user privacy.
- Set up a Firebase database to store user details and order histories, optimizing data access and retrieval for efficient order processing.
- Contributed to front-end design, creating responsive and intuitive interfaces that align with e-commerce standards, enhancing user engagement.
- Scoped out secure payment gateway integration as a future development phase, ensuring a scalable design to support various payment options for enhanced user convenience.
- Integrated AI chatbot for the user to connect with the system and get guidance.

CERTIFICATION COURSES

Certificates

- Google Analytics Course by Google.
- Python Basics For Data Science from EdX.
- Python Essentials from EdX.
- Introduction to IoT from NPTEL.
- Geodata Processing using Python, ML from IIRS.
